

Electron Planck-link audit: $\phi^{-18} \rightarrow \phi^{-108} \rightarrow \phi^{-107} \rightarrow (1-5 \alpha)$

Audit gates

H3 integer

$1^2 + 5^2 + 9^2 = 107$

Coxeter sweep

unique finite hit for 107

Mass residual

1006 ppm vs CODATA

Score band

threshold 1100 ppm

Physical link

O.14 remains open

Reading: the arithmetic ladder passes the displayed comparison band, but the 6D AKN K0 / Dixmier-residue physical link is not closed.
